

The Q-LED system is a block construction based on a technically advanced lighting fixture and a replaceable Q-POWER-BANK LI-ION battery. Thanks to our solutions, the set can be freely configured in terms of power or power source. We offer lightweight tripods made of aluminum, and the adjustable Q-GRIP handle allows easy mounting of the device anywhere.

← Q-TRIPOD support stand weighing 3.9 kg with expansion function

Possibility to install lighting in narrow passages and small rooms without obstructing traffic →

← Three-legged base with adjustable length allows you to set up the tripod on uneven ground

360° articulated arm locked by one movement allows you to set the light beam in any direction

Smooth power regulation 800 ~ 10.000lm
Working time from 7h to 80h
Min. Battery life 1000 cycles
Our lighting does not damage eyes > 85 Ra
Available colors from 3000K to 6000K
Mast height 3 meters
Additional 230V AC IP67 power supply

The Q-GRIP handle makes mounting possible
lighting without using a triod ↓

↑ Installation at any angle

Non-wearing grip pads made of
polyurethane do not leave marks

← Housing made of high quality aluminium, plastics and tempered glass

Resistant to Impact and chemical agents, waterproof, dustproof, intrinsically safe

Level of protection:

Ex II 3G Ex ic nC IIB T4 Gc IP67

Specially designed version for uniformed services
Q-LED MINI with the cover construction, which allows to wear the kit in hand or on back

Available Q-LED versions:

- MAX (Q-TRIPOD) - 10.000lm
